Springer-Verlag New York Inc., United States, 2010. Hardback. Condition: New. 2010 ed. Language: English. Brand new Book. In 2005 the CoastGIS symposium and exhibition was once again held in Aberdeen, Scotland, in the UK, the second time that we have had the privilege host this international event in the city of Aberdeen. This was the 6th International Symposium Computer Mapping and GIS for Coastal Zone Management, a collaboration between the International Cartographic Association's (ICA) Commission on Marine Cartography, and the International Geographical Union's (IGU) Commission on Coastal Systems. The theme for 2005 was: Defining and Building a Marine and Coastal Spatial Data Infrastructure. As a major coastal event, the CoastGIS series of conferences always attracts an international audience of coastal researchers, managers, and practitioners who use one or more of the geospatial technologies (e. g. GIS, GPS, digital mapping, remote sensing, databases, and the Internet) in their work. The CoastGIS series is fundamentally an international event which over the years has gained a strong following attracting delegates from around the globe. Hosted by the University of Aberdeen - at the Aberdeen Exhibition and Conference Centre (AECC) - once again CoastGIS 2005 provided an opportunity to communicate the results of a wide range of innovative scientific research into coastal and marine applications of the geospatial technologies, including remote sensing, Geographical Information Systems (GIS), Global Positioning Systems (GPS), databases, data models, the Internet and online mapping systems.
